HRM INTERNSHIP TASK 1

Recruitment & Job Description

Assignment	Preparation of Job Descriptions for Two Roles
Job Roles	HR Executive and Software Developer
Prepared for	Horizon TechX HRM Internship

Note: These are sample job descriptions prepared for an internship assignment.

Company-specific details such as location, salary, and employment terms should be confirmed by the hiring organization.

JOB DESCRIPTION 1: HR EXECUTIVE

Job Title	HR Executive
Department	Human Resources
Employment Type	Full-time (sample designation)
Work Location	To be confirmed by the employer
Reports To	HR Manager / HR Lead
Experience Level	Entry-level / 0–2 years (indicative)

1. Job Summary

The HR Executive supports the day-to-day activities of the Human Resources department. The role helps coordinate recruitment, onboarding, employee records, attendance, HR documentation, and employee communication while maintaining confidentiality and following organizational policies.

2. Key Job Responsibilities

- Assist with recruitment activities, including posting vacancies, screening applications, scheduling interviews, and communicating with candidates.
- Coordinate joining formalities and onboarding activities for new employees.
- Maintain and update employee records, personnel files, and HR databases accurately.
- Support attendance, leave records, and basic payroll-related data preparation in coordination with the responsible team.
- Help communicate HR policies, workplace guidelines, and internal announcements to employees.
- Assist in organizing employee engagement activities, training sessions, and feedback surveys.
- Prepare routine HR reports, letters, forms, and other documentation as required.
- Handle employee information confidentially and follow applicable company policies and procedures.

3. Educational Qualifications

- Bachelor’s degree in Human Resources, Business Administration, Management, or a related field is preferred.
- Candidates with relevant coursework, projects, or internship experience in HR may also be considered for entry-level roles.

4. Required Skills

- Good verbal and written communication skills.
- Basic understanding of recruitment, onboarding, and employee documentation.
- Working knowledge of MS Word, Excel, email, and online collaboration tools.
- Strong organization, time management, and attention to detail.
- Professional conduct, discretion, and ability to maintain confidentiality.
- Teamwork, problem-solving, and willingness to learn.

5. Preferred Skills

- Familiarity with HR software or applicant tracking systems (ATS).
- Basic awareness of labour-law compliance and workplace policies.
- Experience preparing reports, forms, or employee surveys through academic projects or internships.

6. Key Performance Indicators (Illustrative)

- Accuracy and timely updating of employee records.
- Timely coordination of interviews and onboarding tasks.
- Completion of assigned HR documentation within deadlines.

• Professional and confidential handling of employee information.

JOB DESCRIPTION 2: SOFTWARE DEVELOPER

Job Title	Software Developer
Department	Software Development / Engineering
Employment Type	Full-time (sample designation)
Work Location	To be confirmed by the employer
Reports To	Software Development Team Lead / Engineering Manager
Experience Level	Entry-level / 0–2 years (indicative)

1. Job Summary

The Software Developer designs, develops, tests, and maintains software applications based on project requirements. The role involves writing readable code, fixing defects, collaborating with team members, documenting technical work, and contributing to reliable and user-friendly software solutions.

2. Key Job Responsibilities

- Understand project requirements and help translate them into technical tasks.
- Write, test, debug, and maintain code using the programming languages and tools selected for the project.
- Develop or update application features according to approved specifications and design guidelines.
- Identify software defects, investigate their causes, and implement appropriate fixes.
- Participate in code reviews and follow coding standards, version-control practices, and development workflows.
- Work with designers, testers, product teams, and other developers to deliver project tasks.
- Prepare and maintain basic technical documentation, including setup instructions and notes about changes.
- Test applications for functionality, usability, and reliability, and report issues when found.
- Continue learning relevant technologies and apply feedback to improve code quality.

3. Educational Qualifications

- Bachelor’s degree or diploma in Computer Science, Information Technology, Software Engineering, or a related field is preferred.
- Candidates with demonstrable coding projects, relevant coursework, or equivalent practical skills may be considered for entry-level roles.

4. Required Skills

- Basic proficiency in at least one programming language relevant to the role, such as Java, Python, JavaScript, or C#.
- Understanding of programming fundamentals, data structures, and problem-solving.
- Basic knowledge of debugging, software testing, and writing maintainable code.
- Familiarity with Git or another version-control system.
- Ability to understand technical requirements and document work clearly.
- Communication, teamwork, time management, and willingness to learn.

5. Preferred Skills

- Familiarity with databases and basic SQL.
- Understanding of APIs, web technologies, or application frameworks relevant to the project.
- Experience using GitHub or similar platforms to share projects.
- A portfolio of academic, personal, or internship projects.

6. Key Performance Indicators (Illustrative)

- Completion of assigned development tasks within agreed timelines.

- Code quality, readability, and adherence to project standards.
- Effectiveness in identifying and resolving defects.
- Quality of collaboration, documentation, and participation in code reviews.

Conclusion

These job descriptions outline the purpose, responsibilities, qualifications, and skills commonly associated with an entry-level HR Executive and Software Developer. Actual requirements may vary by organization, industry, and role level.
